

# CIT125 Web Design & Development

For this lesson read chapter(s).

- Chapter 17 Introducing JavaScript

## Files Provided:

- Working Components (**JavaScript's for assignment**)
- Video of Instructor's version of a website using JavaScript
- Inserting JavaScript Video (**Download from Course Documents on Blackboard**)

For this lesson you will be using JavaScript. Two chapters and one assignment are not enough to learn JavaScript, but in these chapters, you will gain some experience in using JavaScript. The file folder, Working Components, contains code and working examples of the JavaScript you will need for this assignment. To use JavaScript all that you will need to do is copy & paste the working code.

Note: Do not make changes to the Working Components as they will serve as a backup if something goes wrong! Make a copy if you want to experiment.

## ASSIGNMENT:

Create a ONE-PAGE website on a restaurant of your choice.

I recommend that you use HTML5 buttons for the navigation instead of the JavaScript buttons as they require less code.

## CHECK LIST

- ✓ Create master folder: lastnameChp17-19
- ✓ Create home page: index.htm
- ✓ **MUST USE AT LEAST THREE JavaSrcipts (Provided)**
- ✓ Site **MUST** be ONE page
- ✓ All block elements **MUST** use absolute positioning.
- ✓ **ALL TEXT, LINKS AND BUTTONS MUST BE STYLED.**
- ✓ Paragraphs **MUST** be left aligned
- ✓ **CAN** have **ONE** video only 3 minutes max! (This is optional)
- ✓ **TEXT AROUND IMAGES MUST USE:**  
`<img src="" width="0" height="0" align="middle" style="margin:0px 0px">`
- ✓ ALL images **MUST** be in an image folder and the image folder goes in the sub folder

- ✓ Page width (wrapper and master) **MUST** be 1200px
- ✓ Page height **MUST** at least be 3500px
- ✓ All colors **MUST** be hexadecimal code beginning with the # symbol and lower case
- ✓ **CANNOT** use heading tags (h1-h6).
- ✓ **MUST** have a references (footer) for outside source material (Cannot be links)
- ✓ **MUST** have a color scheme. (**Check colorschemedesigner.com if needed**)
- ✓ Images over 1000px **MUST** be resized maintaining aspect ratio (**Can use paint.net if needed**)
- ✓ Footer **MUST** have advertising
- ✓ Can only copy text and images, ALL html code **MUST** be your own work.
- ✓ **ANOMALIES MUST** be corrected (See notes)
- ✓ All pages **MUST** be used to the fullest content (**No half empty columns**)
- ✓ Spelling counts
- ✓ **MUST** include completed document segment
- ✓ Your master folder **MUST** be compressed
- ✓ Submit assignment to blackboard by mid-night Tuesday **NOVEMBER 19**

This section is HTML 5 Standard, not all apply to this assignment

- ✓ All Web page documents will begin with; <!DOCTYPE html> and <html lang="en">
- ✓ All XHTML elements, tags and their attributes, must be lower case
- ✓ All tags on the example template document are required
- ✓ The <title> tag is the first tag in the header section and **MUST** have a title
- ✓ All tags must be closed
- ✓ All attribute values must be contained in quotation marks
- ✓ All attribute values must have values
- ✓ There should be no line breaks or extra blank spaces between attributes
- ✓ All tags must be properly nested
- ✓ Formatting will be configured with embedded styling or external style sheets
- ✓ ALL work **MUST** be you own
- ✓ The <font> will not be used - **deprecated**
- ✓ The <center> will not be used - **deprecated**
- ✓ All color attributes must be hexadecimal - **required by instructor**

**NOTE:** Since you may be adding your own material here are the guide lines:

- No obscene or pornographic material
- No weapons or illegal substances

- Nothing illegal
- Nothing defamatory
- Nothing fraudulent

**NOTE: All assignment MUST be submitted to Blackboard or will NOT be accepted!**

## Cleaning-up Anomalies

Text from Internet sources such as Wikipedia may have anomalies created mostly by symbols from Word processing:

From June through August 1959 the Charleston Navy Yard in South Carolina removed all Requin's radar equipment and improved her streamlining. Upon her conversion to Fleet Snorkel configuration, she was given hull classification symbol SS-481 on 15 August 1959, and rejoined SubRon 6 in Norfolk for operations as a normal attack submarine, a role she retained until her decommissioning[1].

Requin conducted local operations off the East Coast and in the Caribbean Sea. On 20 September 1963, Requin completed her 5000th dive. From 7 January 1964 into May she operated with the Sixth Fleet, then resumed her Second Fleet duties into 1968, interrupted only twice for extended deployments. Operation UNITAS VII in the fall of 1966 called for Requin to cruise around the South American continent for exercises with various South American navies and her last Sixth Fleet deployment sent her back to the Mediterranean for duty from 4 April to 27 July 1967[2].

Requin's last Mediterranean deployment began on 4 April 1967. On 8 June, just as she completed a series of exercises with the Sixth Fleet, she received word that the US signal intelligence ship Liberty (AGTR-5) was under attack. Requin's crew prepared to go to the defense of Liberty, but received orders from the Sixth Fleet commander to surface and proceed to Crete. On 28 May 1968, in her last deployment before decommissioning, Requin departed Norfolk, Virginia, as part of the search effort for the missing nuclear attack submarine Scorpion (SSN-589). On 29 June 1968, Requin was reclassified AGSS-481 and in October 1968 she began inactivation at Norfolk. Decommissioned on 3 December 1968, she was towed to St. Petersburg, Florida in February 1969 and served there as a Naval Reserve Training ship. On 30 June 1971 Requin was reclassified as IXSS-481, and on 20 December 1971 she was struck from the Naval Vessel Register.

These anomalies need to be removed and/or replaced.
