

CIT125 Web Design & Development

For this lesson read chapter 20 iFrames

FILES PROVIDED

- Example iFrames ([Download from Course Documents on Blackboard](#))
- Example iFrame Video ([Provided](#))
- 1957 Chev 2019 Video ([Provided](#))

ASSIGNMENT:

Create a website about your favorite car (or truck). The website is to be **THREE** or more pages ([Cannot use 57 Chevrolet](#)).

The site is a **MULTI-PAGE WEBSITE** and is to be done using CSS absolute positioning with embedded styling.

RESEARCH CONSIDERATIONS:

- Images
- History
- Design

The iFrame is to be used to display images of the selected vehicle. The iFrame is linked to a separate webpage that only displays through the iFrame.

BROWSERS:

I recommend using Chrome, Firefox and Safari for your websites as they all will display your work about the same. Internet explorer has the tendency to display websites differently.

CHECK LIST

- ✓ Create master folder: lastnameChp20
- ✓ Create home page: index.htm
- ✓ Create subfolder: index_files
- ✓ **MUST** have width 1000px
- ✓ **MUST** have height at least 1800px
- ✓ **MUST** have at least three pages
- ✓ **MUST** have header image or video (**If video is used, MUST be on home page**)
- ✓ Can only have **ONE** video
- ✓ Anomalies **MUST** be corrected ([See notes](#))

- ✓ All contents **MUST** be used to the fullest content (**No half empty boxes**)
- ✓ Spelling counts
- ✓ **NO** header tags are used
- ✓ **All** informational text is left aligned
- ✓ **All** text and title **MUST** be styled
- ✓ **MUST** include document segment
- ✓ **MUST** cite references
- ✓ Return links **MUST** be styled and have **NO** underline
- ✓ Your master folder **MUST** be compressed
- ✓ ALL work **MUST** be your own
- ✓ Submit assignment to blackboard by mid-night Tuesday **DECEMBER 3**

NOTE: All assignment **MUST be submitted to Blackboard or will NOT be accepted!**

This section is HTML 5 Standard, not all apply to this assignment

- ✓ All Web page documents will begin with; <!DOCTYPE html> and <html lang="en">
- ✓ All tags on the example template document are required
- ✓ The <title> tag is the first tag in the header section
- ✓ All tags must be closed
- ✓ All attribute values must be contained in quotation marks
- ✓ All attribute values must have values
- ✓ There should be no line breaks or extra blank spaces between attributes
- ✓ All tags must be properly nested
- ✓ Tag-specific nesting restrictions apply
- ✓ Formatting will be configured with embedded styling or style sheets
- ✓ The will not be used - **deprecated**
- ✓ The <center> will not be used - **deprecated**
- ✓ All color attributes must be hexadecimal - **required by instructor**

NOTE: Since you may be adding your own material here are the guide lines:

- No obscene or pornographic material
- No illegal substances
- Nothing illegal
- Nothing defamatory or fraudulent

NOTES

Cleaning-up Anomalies

Text from Internet sources such as Wikipedia may have anomalies created mostly by symbols from Word processing:

From June through August 1959 the Charleston Navy Yard in South Carolina removed all Requin♦'s rear equipment and improved her streamlining. Upon her conversion to Fleet Snorkel configuration, she was given hull classification symbol SS-481 on 15 August 1959, and rejoined SubRon 6 in Norfolk for operations as a normal attack submarine, a role she retained until her decommissioning[1].

Requin conducted local operations off the East Coast and in the Caribbean Sea. On 20 September 1963, Requin completed her 5000th dive. From January 1964 into May she operated with the Sixth Fleet, then resumed her Second Fleet duties into 1968, interrupted only twice for extended deployments. Operation UNITAS VII in the fall of 1966 called for Requin to cruise around the South American continent for exercises with various South American navies and her last Sixth Fleet deployment sent her back to the Mediterranean for duty from 4 April to 27 July 1967[2].

Requin♦'s last Mediterranean deployment began on 4 April 1967. On 8 June, just as she completed a series of exercises with the Sixth Fleet, she received word that the US signal intelligence ship Liberty (AGTR-5) was under attack. Requin♦'s crew prepared to go to the defense of Liberty, but received orders from the Sixth Fleet commander to surface and proceed to Crete. On 28 May 1968, in her last deployment before decommissioning, Requin departed Norfolk, Virginia, as part of the search effort for the missing nuclear attack submarine Scorpion (SSN-589). On 29 June 1968, Requin was reclassified AGSS-481 and in October 1968 she began inactivation at Norfolk. Decommissioned on 3 December 1968, she was towed to St. Petersburg, Florida in February 1969 and served there as a Naval Reserve Training ship. On 30 June 1971 Requin was reclassified as IXSS-481, and on 20 December 1971 she was struck from the Naval Vessel Register.

These anomalies need to be removed and/or replaced.

Anomalies
